Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 27 January 2005.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-8, 10, 11, 13-20 and 22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Johnson (U.S. Patent 3,396,643) in view of Feliz (U.S. Patent 4,253,256).

Johnson discloses an apparatus for spreading aggregate material including an engine carrier by a body, and a powered motive structure (16, 17). There is a non-driving wheel structure (71) movable between an inoperative position (Figure 2, for example) and a ground engaging position (Figure 5, for example). There is a lift jack constructed and arranged to lift a portion of the body with respect to the ground to enable the hitch structure to be in a position to be coupled with a vehicle for towing the apparatus (Figures 4 and 5). Because the invention is directed elsewhere, Johnson is silent with respect to the hopper and dispensing structure. Feliz teaches the apparatus having the hopper and dispensing structure as claimed. It would have been obvious to one of ordinary skill in the art at the time the invention was made to have used the hopper and dispensing structure of Feliz with the apparatus of Johnson in order to obtain a multi-function material distribution machine, as taught by Feliz.

Claims 1-8, 10, 11, 13-20 and 22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Feliz (U.S. Patent 4,253,256) in view of Johnson (U.S. Patent 3,396,643).

Art Unit: 3671

Feliz discloses an apparatus including a body carrying an engine (Figure 1, for example). There is a motive structure (3), a hopper (300), dispensing structure (conveyors, Figure 1, for example), and a wheel structure (Figure 4). The motive structure operates in the manner claimed, but the wheel structure is not taught to move such that it does not engage the ground. Johnson teaches the non-driving wheel structure, hitch structure and lift jack as discussed above. It would have been obvious to one of ordinary skill in the art at the time the invention was made to have used this configuration on the apparatus of Feliz in order to ease transportation of the apparatus to a work site, as taught by Johnson.

Claims 8 and 20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Johnson/Feliz or Feliz/Johnson as applied above, and further in view of Vangaever (U.S. Patent 4,895,476).

Neither Feliz nor Johnson teach the powered broom structure; however, it is well known to use powered brooms with material distribution apparatuses in order to more effectively control material, as exemplified by Vangaever. It would have been obvious to one of ordinary skill in the art at the time the invention was made to have used a powered broom with Johnson or Feliz for this purpose.

Allowable Subject Matter

Claims 9 and 21 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

Applicant's arguments filed January 27, 2005 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

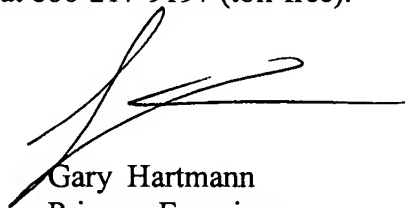

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
